

# User Manual

## Launching the program

1. Open the [noWires.exe](#) file to launch the program.

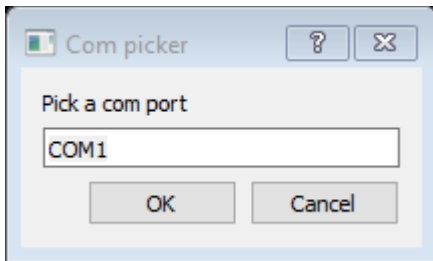

## Main Window

## ***Connect***

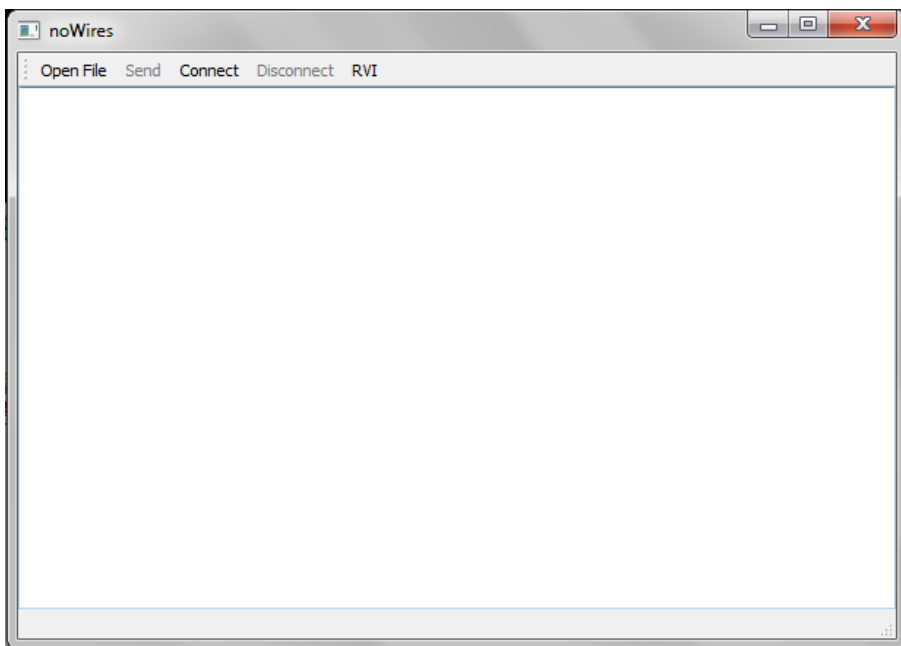

1. In the **main window**, Click the **Connect** button on the menu bar to open the COMM picker window. Enter a COMM port and click **OK**.

---

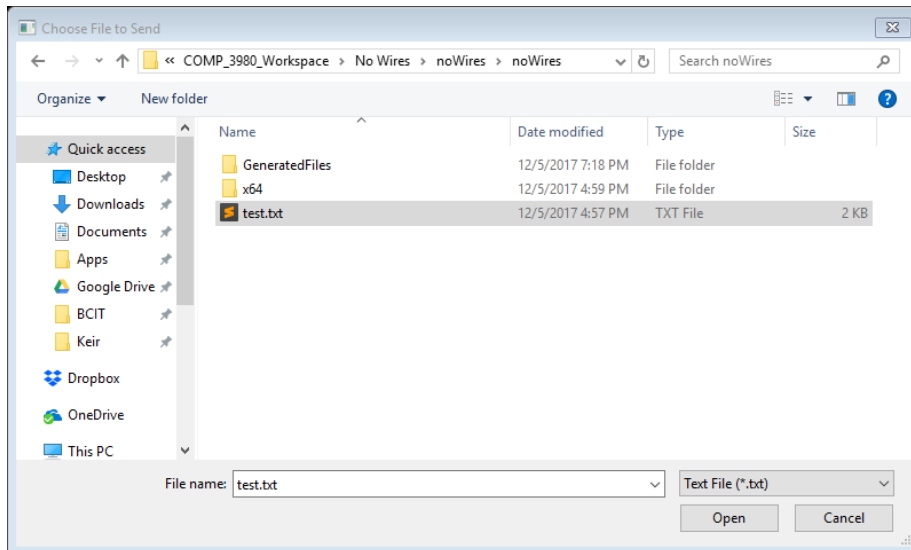

## ***Disconnect***

1. In the **main window**, Click the **Disconnect** button on the menu bar to break the connection.

## ***Sending a file***

In the **main window**, click the **Open File** button on the menu bar to open the file picker window. Select a file for sending and click **Open**. Back in the **main window**, click the **Send** button to send the file.

## ***Reverse Interrupt***

In the main window, click the **RVI** button to send a reverse interrupt to the receiver.
